

Software Development

Give your business an Edge with picture perfect solutions.

We are a large group of software engineers with proven track record diverse expertise and are able to poise software development efforts and project extent to your business requirements. We are quick to grasp the uniqueness of each of our clients and focus painstakingly on the individual needs of our clients as a basic step to move forward. With us, you can be sure of unfaltering support, stronger trust and state of the art software development cycle.

When it comes to Software Development Services, we have successfully delivered a variety of customized software products to clients spread across domains. We have expertise for both Web and desktop based software application solutions. In spite of the disadvantages desktop applications are still as popular as web application. However most enterprises use and opt for web based solution for global access. Many solutions especially those that involve hardware/software interaction can only be built for the desktop, so both goes parallel. We offer to build back-office applications that can be used by clients to manage their operations as well as to manage their websites.

Our team is capable to produce customized software solution at various levels. Our team of experts will analyze your requirements and suggest the either the web/desktop mode of

development.

Technologies

Software Services possess the expertise on whole range of technologies that can be used to develop efficient software products. We always choose most feasible and efficient technology for designing and developing solutions and believe that it works as a base that caters to the exact business needs. We provide you with a strikingly balanced software development and minimal project duration, availing you the otherwise rare cost advantage for your business. These include:

- .Net
- Php
- C++/VC++
- C#, VB.NET etc
- Java

At Infomatrix Technologies Software application solutions readily offer to develop a diversity of software components that can be integrated as per requirement with existing software products to extend their basic functionality for its future usage.

Our end product speaks for our dedication to serve you the best.
