Infomatrix Technologies is a professional web services company for web based activities which range from Web Hosting, Web Designing, Web Development, Internet marketing Services and promoting website, on the Global medium. We offer a complete spectrum of Website Designing, Web Development, Software Development, Internet Marketing, Advertising and consulting services as System Integration, Network Design and Implementation, Corporate Computer Solutions, Server Maintenance and Support services to small and large business.

Our business model focuses on having long-term strategic relationship with clients and a significant portion of our revenue comes from repeat business from our client base extending across India.

With our strategically located marketing business centers and a virtual team model, we can provide high quality, mission critical, rapid time-to-marketing solutions on time and within budget. All professionals at Infomatrix Technologies are derived from leading institutions of higher learning in India and are seasoned having worked on leading projects both at Infomatrix Technologies and in their past experiences.

We invest heavily on new technologies through research and development and further refining our effort in using existing ones, making us the leader amongst our peer group. Our sustained growth as a technology partner, delivering competitive business advantage, comes from our presence at the top of the technology evolution and maturity curve.

In Addition, we feel we have the power to breathe life into technology in ways that can change how people use, work, and interact on the Internet. Our user-centric interface design team is one of the best from India. Their creative expertise and use of cutting edge technologies ensures we are creating meaningful connections between people, ideas, art, and technology and developing Internet solutions unparalleled in the industry.
